

Do you experience multiple migraines each month?

Cumbria Partnership NHS Trust is managing the **BrainCool–Migraine study** in the North of England.

It involves cooling of the inside of the nose during a migraine, using a newly developed device.

Eligibility criteria for participants are:

- Aged 18 - 70 years
- 1 - 15 migraines a month
- Migraine for over one year
- No changes to migraine medication in the last 3 months
- Generally fit and well, no history of heart disease
- No current, or planned, pregnancy during trial period
